TO WHOM IT MAY CONCERN

Dear Sir/Madam,

I am writing to provide essential information regarding Lithium batteries (Chongqing Jinjian Trading Co.Ltd.) and their environmental impact. It is important to clarify that these batteries are not harmful to the environment, and they can be recycled and reused responsibly.

These batteries are designed with sustainability in mind. Furthermore, Lithium batteries are fully recyclable, and the recycling process is both economically viable and environmentally responsible. Hence, we give the Lithium batteries to the recycle manufacturing plant.

We want to assure you that our company is committed to adhering to all environmental regulations and standards. We believe in the responsible use and disposal of battery product and support initiatives aimed at reducing waste and minimizing the ecological footprint of our products.

Thank you for your attention to this matter. We appreciate your dedication to environmental protection and look forward to your continued support in promoting sustainable technologies.

Should you have any questions or require further information, please feel free to contact us at your convenience.

Sincerely,

Raman Bajracharya

Sales Executive
